

Mr. Powell please take seriously your duty as the Chair of the FCC. Our country is founded upon Democratic principles and like it or not the voice of the public is an important consideration in making decisions that affect the entire country. Please listen to public opinion before making your decision on changing the rules for the FCC. You may stay your current course, but listening to the public gives credibility to your stance and is an important tradition in our culture. To be an American means to give voice to the people. Thank you. Kirsten Fletcher

This was sent before your vote but I was unable to get it directly to you. I hope it weighs heavily on your mind that you did not care to listen to the American public on this issue.
